MILTON
OLIVEIRA

Java Student and Developer |
Data Base | SQL | Angular

About Me

I have many years of experience with teamwork, I have worked in the production sector for over 19 years. I'm studying the area of development and technology, an area that I've been interested in for a long time, but I didn't have the opportunity to dedicate myself before, now I'm at a point where I have more time, and I'm dedicating time to studying and delving deeper in the development area. Going through several fronts of study in the area, such as front-end, AI, machine learning... But what else I have studied, and seeking to delve deeper is in the Back-end, more specifically with Java and Bank of Data. And with that, I can't wait to get my hands dirty to learn even more about this area, and of course, put into practice what I've learned.
